HISTORY

- Created in 1997, the ATHENS Network is made up of **14 leading European technological universities and nine ParisTech Graduate Schools of Engineering**.
- The principal goal of the Network is **to facilitate the exchange of students, teachers and researchers from major European technological universities** and to participate together under European technological development and training programmes.
- The Network was established with the support of the European Communities SOCRATES Programme, receiving an annual subsidy from 1997-2001. Today the Programme is mainly funded by contributions from the member institutions.

INTENSIVE COURSE PROGRAMME

- Twice a year, the ATHENS Network organizes a programme of **7-day intensive courses** at member institutions.
- The programme, known as the **ATHENS week** includes a wide range of courses in engineering and social sciences as well as a number of “European Dimension” activities in each country.
- The objective of the programme is to give students a brief immersion in another European education system. It permits participants from different institutions to take short courses of a high scientific level and to mix with students of different nationalities and backgrounds.
